Site Preparation for Highway Facility

Scope of work to be completed:

- Temporary erosion control.
- All stumps and excess topsoil to be stockpiled onsite and stabilized.
- All erosion control infiltration and retention ponds to be completed and seeded including drainage swales as per plans.
- Subgrade site and place gravel products as per plan in paved, gravel, and building areas.
- Gravel and crush gravel for driveway and parking area to be supplied by the town.
- All other areas to be stumped cleared and graded so as areas can be mowed with tractor and brush hog and seeded and mulched per stabilization requirements.
- All contractors are required to submit proof of insurance including workers compensation insurance and bond quotes directly to this Middleton Municipal office from the insurers prior to bid closing. Bond quotes should not be included in the original bid cost and will be considered extra cost to the town upon acceptance.
- References to a minimum of three projects of this type and cost range
- Price must remain valid through 2017 and the 2018 work seasons; with a completion date of September 30, 2018.
- For plans please contact Scott Lawler or Paul Blanc at Norway Plains (603)335-3948, project number to reference is 15076.

The town has the right to accept or refuse any or all bids.

Any questions regarding site work to be done should be addressed to Road Agent Rick Washburn or Foreman Ed Brannan at (603) 473-5229.
